Biodegradable & Compostable Courier Bags

Secure, Sustainable & Plastic-Free Packaging for the Future

World Commerce Inc. compostable courier bags are a durable, tamper-proof, plant-based alternative to conventional plastic mailers, designed for e-commerce, D2C brands, retail shipping, and modern responsible businesses.

- **100% Compostable**
- **Tamper-Proof & Tear-Resistant**
- **Durable & Water-Resistant**
- **Lightweight & Flexible**
- **Plant-Based & Plastic-Free**
- **Writable Surface**

What Are Compostable Courier Bags?

Compostable courier bags are mailer envelopes made from renewable, biodegradable materials that decompose naturally within 180 days in composting conditions, leaving behind only water, CO_2, and organic matter.

Why It Matters

Conventional plastic packaging contributes to massive landfill waste, persists for hundreds of years, and breaks down into harmful microplastics that pollute our oceans, soil, and food systems. Compostable packaging offers a cleaner end-of-life solution, helping businesses reduce their environmental footprint and support a healthier, more sustainable planet.

Why Choose World Commerce Inc.?

World Commerce Inc. focuses on scalable sustainability, practical performance, and supply-chain-ready packaging. Our compostable courier bags deliver the strength, security, and reliability businesses need — without special handling or changes to existing fulfilment processes.

- SCALABLE SUSTAINABILITY
- PRACTICAL PERFORMANCE
- SUPPLY-CHAIN READY

Smarter Shipping. Cleaner Packaging. A Better Future.

Designed for e-commerce, retail dispatch, and responsible global packaging programs.

- E-COMMERCE
- RETAIL DISPATCH
- D2C BRANDS

SUSTAINABLE PACKAGING DIVISION

Biodegradable & Compostable Industrial Packaging

Strong, Sustainable & Scalable

World Commerce Inc. compostable industrial packaging offers a practical, scalable alternative to plastic for logistics, manufacturing, warehousing, and large-scale distribution. Made from plant-based biopolymer materials, it delivers the strength and reliability industries need — without the environmental trade-offs.

PLANT-BASED MATERIALS | CLEANER SUPPLY CHAINS | A GREENER TOMORROW

01 What Is Compostable Industrial Packaging?

Compostable industrial packaging refers to large-scale, heavy-duty packaging materials made from renewable plant-based sources such as corn starch or sugarcane-based polymers. These materials decompose within 180 days under composting conditions, without leaving behind harmful toxins or microplastics.

DECOMPOSES WITHIN **180 DAYS** IN COMPOSTING CONDITIONS

02 Key Features

100% Compostable
Breaks down within 180 days in industrial composting environments.

Heavy-Duty Performance
Built for high load-bearing, tear resistance, and rough handling.

Moisture & Dust Resistant
Helps protect contents during storage and transit.

Plastic-Free & Non-Toxic
Made from plant-based materials with no petroleum-based plastics.

Customizable
Available in multiple thicknesses, sizes, formats, and branding options.

Compatible with Existing Machines
Designed to work with standard extrusion and conversion systems.

03 Why Replace Industrial Plastic Packaging?

Switching to compostable packaging helps businesses become future-ready, ESG-conscious, and aligned with sustainability goals.

04 Why Choose World Commerce Inc.?

World Commerce Inc. focuses on scalable sustainability and cost-effective compostable packaging solutions, helping industries move away from plastic without compromising performance or operational efficiency.

SCALABLE SOLUTIONS | COST-EFFECTIVE SUSTAINABILITY | INDUSTRY EXPERTISE

Industrial Strength. Compostable Future.

Designed for warehousing, logistics, distribution, and responsible large-scale packaging programs.

Cleaner Today Greener Tomorrow

Biodegradable & Compostable Garbage Bags

World Commerce Inc. – A Smarter Way to Dispose Waste Sustainably

PEOPLE FRIENDLY | PLANET FRIENDLY | A CLEANER TOMORROW

- 100% Biodegradable & Compostable
- Durable & Tear-Resistant
- Leak-Proof & Odor-Free
- Eco-Friendly & Plastic-Free
- Certified Compostable
- Suitable for Wet & Dry Waste

A Cleaner Planet Starts with Better Choices

Our garbage bags are a 100% eco-friendly alternative to traditional plastic bags, fully decomposing within 180 days into carbon dioxide, water, and compost without harmful toxins. Made from plant-based materials, they support responsible waste disposal and a lower environmental footprint.

PLANT-BASED MATERIALS | DECOMPOSES WITHIN 180 DAYS | INTO CO_2, WATER & COMPOST | NO HARMFUL TOXINS

Perfect for Everyday Waste Disposal

Ideal for homes, offices, restaurants, hotels, hospitals, and industrial waste disposal. Our bags are strong, flexible, and reliable for kitchen waste, organic waste, office trash, food scraps, and general waste.

Join the Sustainability Movement

Let's create a cleaner, greener and plastic-free future. Choose World Commerce Inc. and make a positive impact for a healthier planet — together.

Biodegradable & Compostable Carry Bags

World Commerce Inc. – 100% Eco-Friendly Carry Solutions

World Commerce Inc. biodegradable and compostable carry bags offer a practical eco-friendly alternative to traditional plastic bags. Designed for retail, grocery, restaurant, and everyday carry needs, these bags decompose within 180 days under composting conditions, leaving behind only carbon dioxide, water, and compost. Built for sustainability without compromising usability, they support responsible packaging choices and a cleaner future.

- **Decomposes within 180 days**
- **Plant-based materials**
- **Supports a circular economy**
- **Retail-ready & customizable**

Why Choose World Commerce Inc. Carry Bags?

Eco-Friendly & Compostable

Breaks down completely without harming the environment.

Durable & Reliable

Designed to be strong, tear-resistant, and suitable for everyday carrying.

Sustainable Alternative

Helps reduce plastic waste and supports greener living.

Versatile Use

Ideal for shopping, grocery stores, restaurants, retail, and packaging applications.

How It Works

Made from plant-based materials, these compostable carry bags deliver the functionality of conventional carry bags while remaining 100% compostable. Once disposed of in suitable composting conditions, they break down naturally instead of persisting in landfills or oceans.

Perfect for Businesses and Individuals

Suitable for retailers, supermarkets, farmers' markets, restaurants, and eco-conscious consumers, World Commerce Inc. carry bags support sustainability goals while offering reliable everyday performance.
